1987 Manitoba Food Products Directory

87-03646/

Manitoba

Minister of Agriculture

Room 165
Legislative Building
Winnipeg, Manitoba, CANADA
R3C 0V8

I am pleased to present the 1987 Manitoba Food Products Directory. This directory has been compiled and produced by the Marketing Branch of Manitoba Agriculture.

It serves as an excellent source of information for anyone interested in obtaining and marketing Manitoba food products.

It provides a listing of processors, distributors, wholesalers, brokers, marketing boards and producer associations who can provide you with the wide range of food services and products that you may require.

We in Manitoba are fortunate to have a very diversified food production and processing industry which plays an important role in the economy of our province.

Please feel free to contact any of the representatives listed in this directory or the staff of the Marketing Branch. They will be able to assist you with specific product information.

Bill Uruski
Minister of Agriculture

CONTENTS

Using the Directory iii
Manitoba Food Products Suppliers and Brokers ..... 1 to 30
Manitoba Wholesale Grocery Distributors 32, 33
Manitoba Vegetable Wholesalers 34, 35
Manitoba Producer Marketing Boards and Associations 36, 37
Facts About Manitoba Agriculture 38
University of Manitoba, Food Science Dept., and Foods and Nutrition Dept. 39
Manitoba Research Council/Canadian Food Products Development Centre 40
Index of Supplies, Manufacturers, Brokers, etc. 41, 42
Index by Commodity 43

Using the Directory

The following listings for suppliers and brokers, contain addresses, telephone and telex numbers as well as the names of representatives to contact.

Product listings are divided into two sections:

(A) PRODUCTS GROWN & PROCESSED IN MANITOBA.

(B) PRODUCTS PROCESSED IN MANITOBA.

Case packs and unit sizes are indicated where applicable.

While the listing is extensive, some firms or organizations may not be shown. Those wishing to be included in future editions should contact the Marketing Branch, Manitoba Agriculture.

Ⓕ — Indicates that the meat or poultry plant is Federally Inspected and is therefore approved for international and interprovincial export

Staff of the Marketing Branch, Manitoba Department of Agriculture, will be pleased to respond to enquiries regarding products grown and processed in Manitoba.

If we can be of assistance in any way, please contact us at the address listed below:

University of Manitoba
Food Science Department
Foods and Nutrition Department

The University of Manitoba has two departments involved with foods, the goals of both departments are designed to train students for employment in specific food areas as well as to do research on food processes and products. The Food Science Department concentrates on the technology of processing agricultural raw materials and moving such materials from the farm gate to the consumers' plate. The Foods and Nutrition Department focuses on consumer use and response to different foods.

The University departments can assist companies to prepare test quantities of new products for market studies; also, they can provide sensory and instrumental testing of various products. Both departments possess a wide variety of technical skills plus complex processing and testing equipment. The departments are most willing to serve as a resource for provincial food companies, with activities designed to be complementary to those of the Canadian Food Products Development Center.

For further information please contact:

Dr. Vivian Bruce
Foods and Nutrition Department
University of Manitoba

Manitoba Research Council
Canadian Food Products Development Centre

The Canadian Food Products Development Centre is designed to provide technical assistance and encouragement to existing food industries, as well as to stimulate the creation of new food processing opportunities in Canada. The Centre is managed by the Manitoba Research Council; it is funded through the Manitoba Department of Industry, Trade and Technology and by fees charged for services.

Food Centre highly trained staff share extensive experience with some of North America's major food companies in the following areas: packaging, canning, thermal processing, drying techniques, ingredient mixing, meat, dairy and vegetable processing, sanitation, nutritional evaluation, sensory evaluation, quality control, quality assurance, seasonings, product development and acceptance, recipe development and shelf-life studies, as well as chemical and microbiological analyses of raw materials and finished products.

In addition to product development services, product evaluation and testing, the 2000 m^2 facility offers access to a fully operational pilot plant. Preliminary assistance is offered at no cost. Detailed projects are on a fee-for-service basis. Centre staff will assist in locating support funding for these projects.

For further information contact:

Facts About Manitoba Agriculture

- The estimated value of agriculture production in 1985 was $2,431.0 million, an increase of 5.6% from 1986. Reduced production and lower commodity prices for grains and oilseeds likely will result in a lower value of production for 1986. In 1986, it is projected that the value of production will decline to $2.2 billion.
- Provides direct income to over 98,000 Manitobans who live on farms or who farm for a living.
- In Manitoba there were 28,700 (projected) farms in 1986 and more than 7.6 million hectares of farmland.

Production Highlights

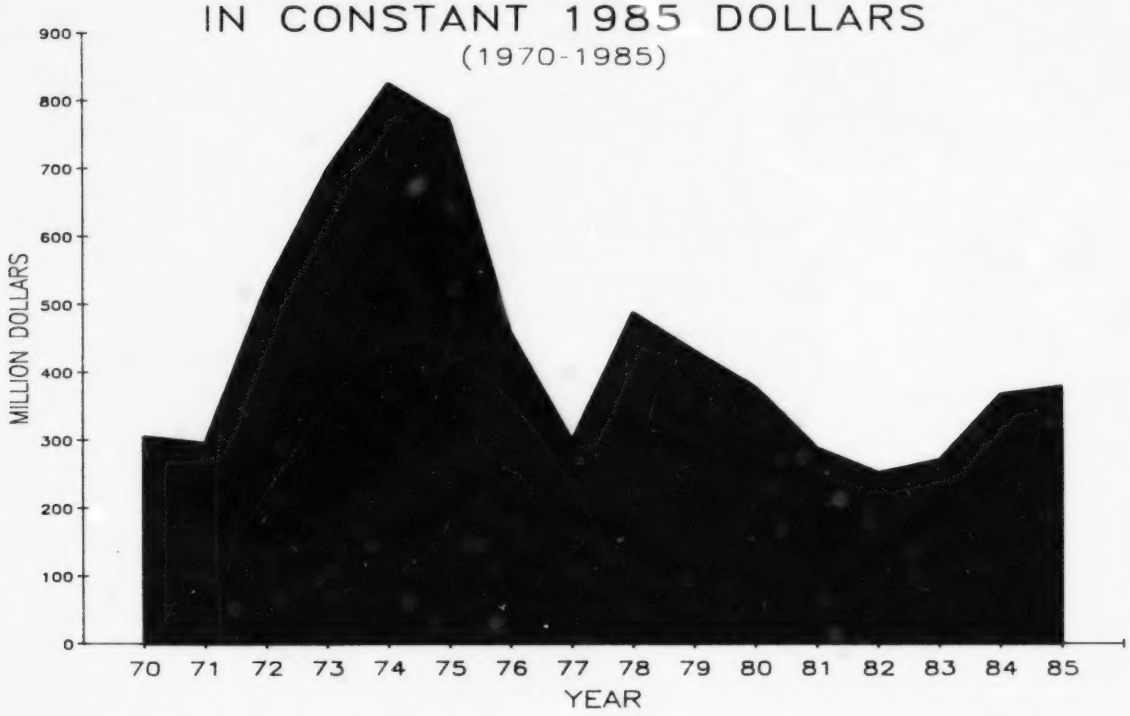
- Estimated value of livestock production, which includes beef, hogs, dairy, sheep and poultry was estimated at $661.4 and $684.5 million in 1984 and 1985, respectively. Markets for Manitoba breeding stock have been developed and expanded in Mexico, Pacific Rim countries and the U.S.A.
- Production of chickens and turkeys in Manitoba in 1985 totalled 17,410 and 1,242 thousand birds respectively which is an increase from last year.
- The value of cash receipts from the sale of honey and wax was estimated at $8.9 and $10.3 million in 1985 and 1986. The major export markets in 1985 for Manitoba, are the U.S.A., West Germany, France, the United Kingdom and Sweden.
- Manitoba accounted for an estimated 55.3% of the total Canadian production of flaxseed in 1986.
- It is projected that in 1986, Manitoba will account for 15.5% and 54.4% of the Canadian canola (rapeseed) and field pea production respectively. Manitoba leads Canada in field pea production.

Agriculture Industry

- For every job gained or lost on farms, another job is gained or lost in other areas of the Manitoba economy. In 1985, one in five jobs in the province was the result of agricultural production.
- Food and beverage processing is the most important manufacturing industry in Manitoba, producing $2.1 billion worth of goods and services in 1984 or about 36% of the province's total manufactured output. Almost all of the agricultural raw materials used by the industry are produced in Manitoba.
- There were also 30 agricultural implement manufacturing firms and numerous other companies indirectly associated with agriculture which together produce almost half a billion dollars worth of equipment in 1983.
- Last year, Manitobans spent $1.3 billion on food which is approx 25% of the value of the province's retail trade. Farmers got about 45 cents of every food dollar, with the balance going to packages, transporters, processors, wholesalers and retailers.
- A Manitoban had to work only half as long in the 1980's as in the 1950's to earn enough money to buy five basic Manitoba produced foods: milk, eggs, bread, potatoes and ground beef.
- In 1940, one farmer produced food for 12 people. Today one farmer can feed 60 people.

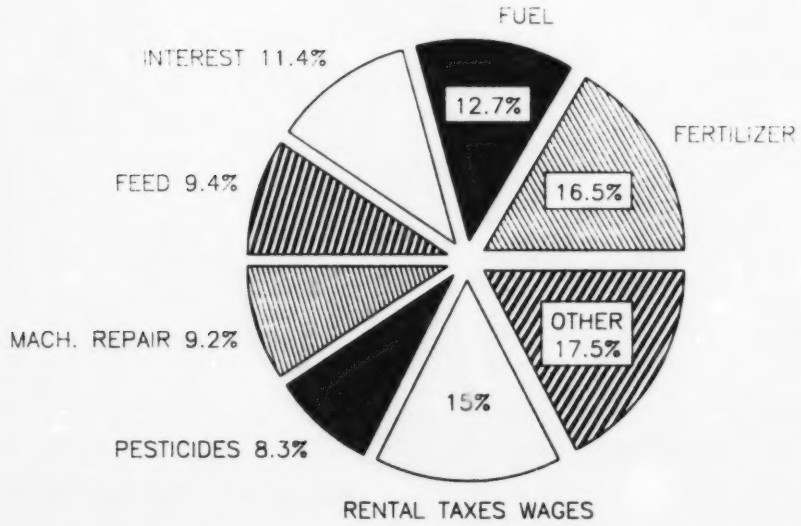
REALIZED NET FARM INCOME IN CONSTANT 1985 DOLLARS

(1970-1985)



PERCENT DISTRIBUTION MAJOR FARM INPUT COSTS

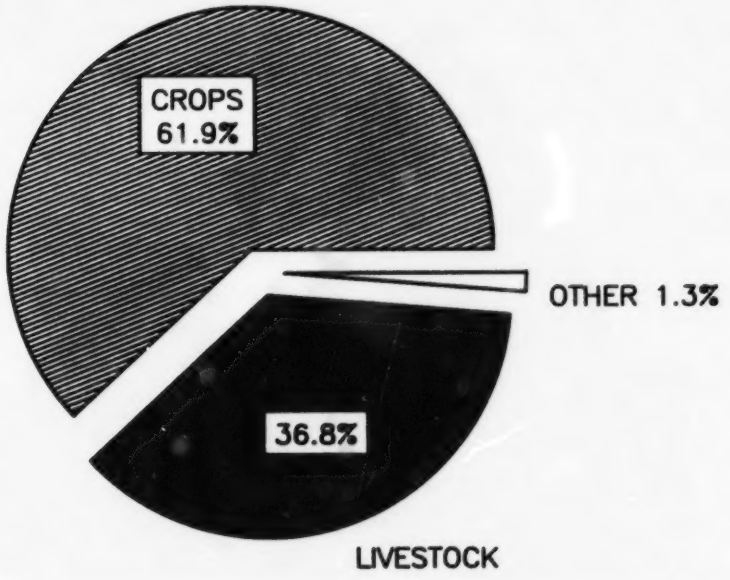
(1985)



The estimated fixed capital invested in 1985 was $8.8 billion, down 5.2% from 1984. The declining trend is expected to continue into 1986 in part due to weaker land prices.

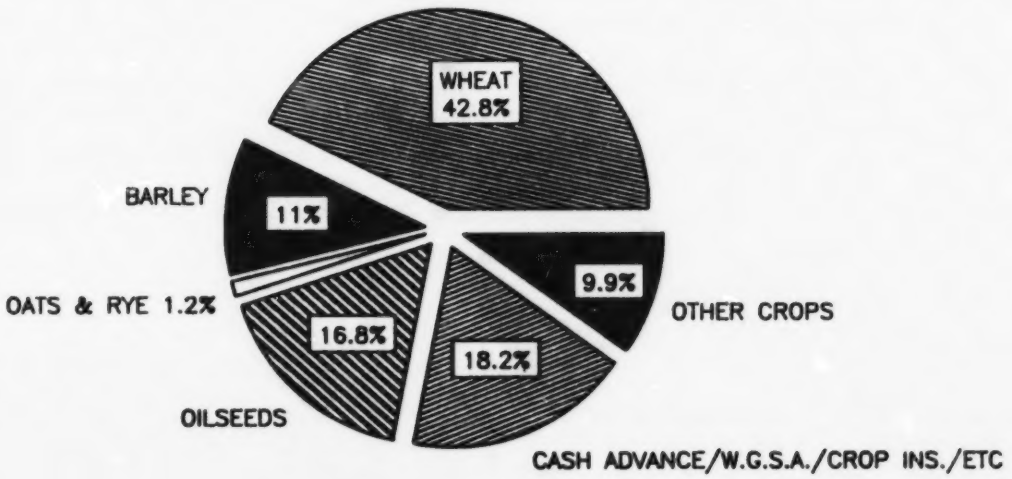
Farm fertilizer, fuel, interest, feed and machinery repair costs are the major farm input costs items and in 1985 they accounted for an estimated 50% of total costs. Lower feed costs in 1986 could result in a total input cost that would be slightly less than 50%.

TOTAL FARM CASH RECEIPTS
(1986)



Estimated farm cash receipts in 1986 were $2,058.6 million, up 3.0% from 1985.

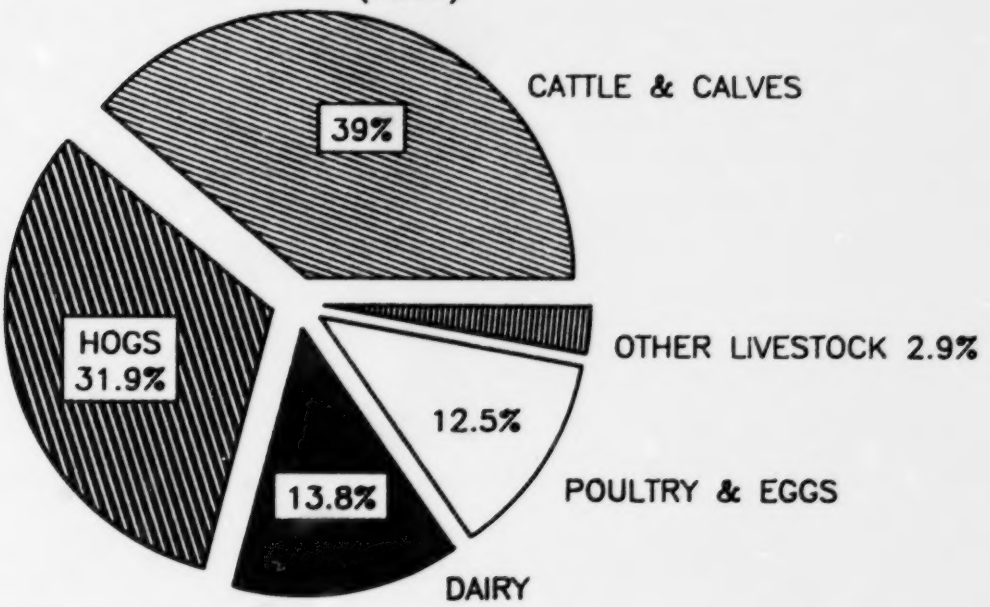
FARM CASH RECEIPTS
CROPS
(1986)



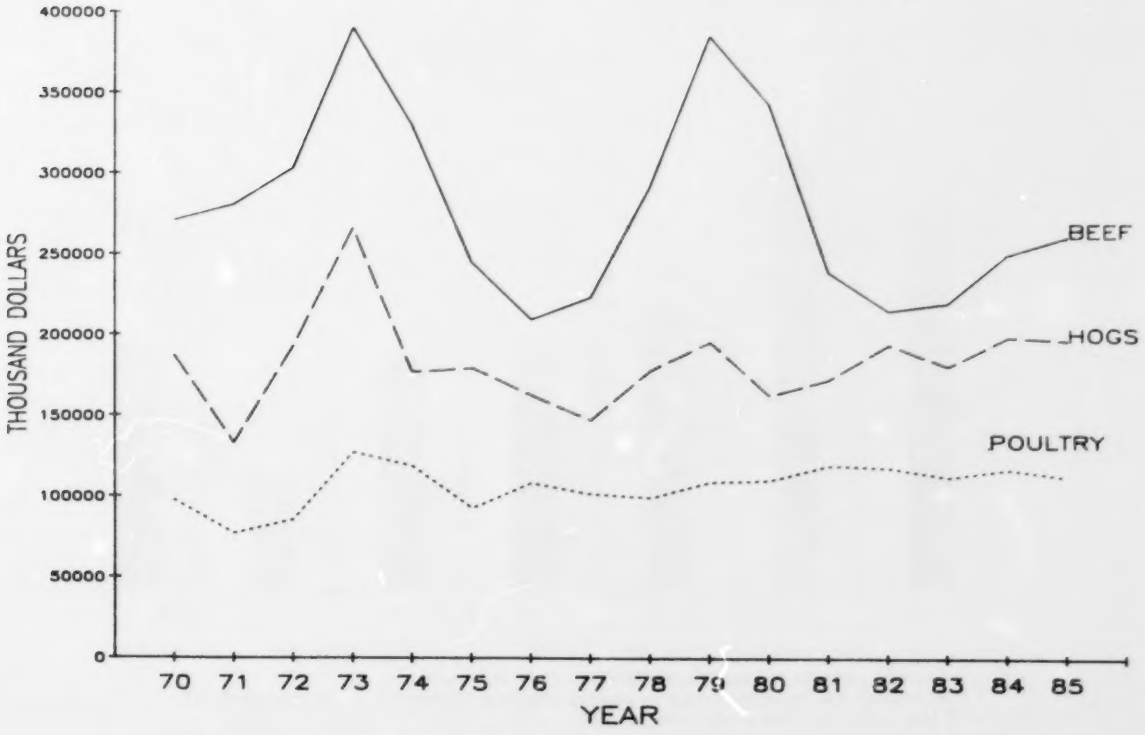
Total area seeded to wheat, oats, barley, rye, flaxseed and canola (rapeseed) in 1986 was 374} 2 thousand hectares (9,245 thousand acres), down 2.2% from 1985.

In 1985, approximately $1.5 billion, 62% of total farm income was derived from the production and sale of cereal, oilseed and special crops. Of this value, approximately two thirds entered the export market with the remainder used domestically.

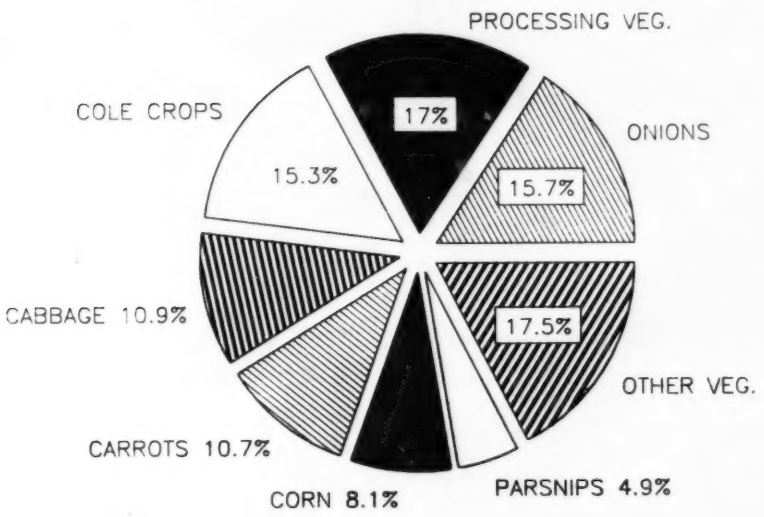
FARM CASH RECEIPTS
LIVESTOCK
(1986)



VALUE OF LIVESTOCK PRODUCTION
IN CONSTANT 1985 DOLLARS

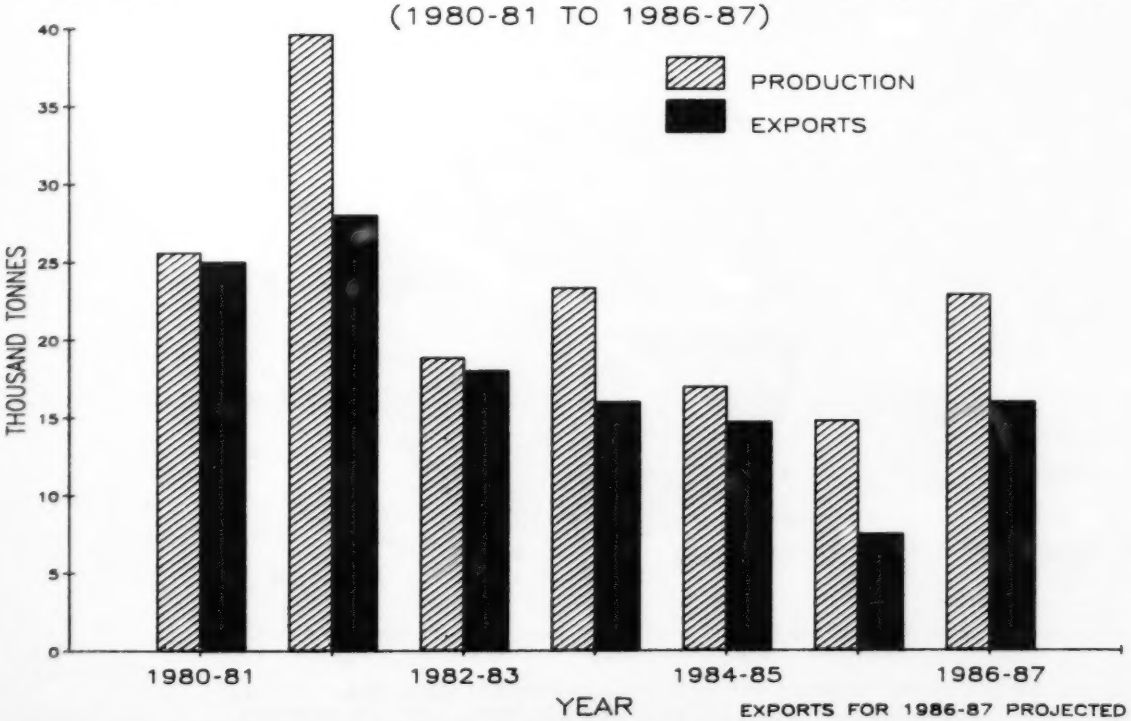


FRESH VEGETABLES
VALUE OF PRODUCTION
(1985)



Twenty varieties of vegetables are grown in Manitoba. Major vegetable crops include potatoes, onions, rutabagas, carrots, cauliflower and cabbage. The estimated value of vegetable production was $6,466,000 in 1985 down 29.3% from the 1984 level.

BUCKWHEAT NET PRODUCTION & EXPORTS
(1980-81 TO 1986-87)



The above graph represents Canadian production and exports. Manitoba is the major buckwheat producing province accounting for a projected 55% of the total Canadian production in 1986.
